DETAILED ACTION

1. This application has been examined. This action is in response to an informational disclosure statement (IDS) filed April 9, 2004. Claims 1-8 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, and 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Nelson.

Note the respective portions 18 and 10, The front portion includes a recessed aperture

“...exposing a valve lever...”. Note column 2, lines 52+. A spherical shape (claim 6) and recessed handle are disclosed such that they can be dragged along the ground easily (column 1, lines 28+. Attachment means 19 is shown. With regard to claim 5, the handle 17a (valve lever) “....partially projects from....” the aperture. Gaskets 15 and 16 are shown in Figure 1.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3753

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 148 USPQ 459, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or unobviousness.

6. Claims 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Knudsen in view of Pall. Knudson discloses the claimed invention except for the recitation of “impingement arms and corresponding impingement cavities” as taught by 28, 54, 56 of Pall. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the shut-off guard of Knudsen et al to include “impingement arms and corresponding impingement cavities” as taught by Pall in order to provide ease of assembly of the respective front 12 and rear 14 of Knudsen et al.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
